- Model SL10 - 198mm (7.8") X 198mm (7.8") square X 60mm (2.36")
- Model SL6R - 4.17" diameter X 2.75"

Solar Bollard Light

Both solar Bollard lights add beauty while providing pedestrians with a sense of safety by illuminating their path.

The in-ground mounted Bollard light is 1,370mm (4.5 feet) tall and 180mm (7 inches) in diameter.

The surface mounted Bollard light includes a base plate mount and 3 concrete anchor bolts and is 990mm (3.25 feet) tall and 180mm (7 inches) in diameter.

Solar Lighting's two solar Bollard lights are unique in their design and engineering.

The Solar Lighting Bollard lights have a main lens with 9 high output white LED's. It also has three smaller narrow accent lenses with high output Blue LEDs. This combination of colored LEDs adds to the Bollard light's aesthetics.
