

Solar Accents

The solar Accent Light is the smallest of our solar lights weighing 110 grams. They are designed as a single point of colored light.

Thanks to their characteristics of no maintenance, durability and wide operating temperature range the Accent light can be installed anywhere.

FEATURES:

- *No batteries to replace
- *Strong enough to drive over
- *Maintenance free
- *100% waterproof (rated IP68)
- *No wiring, timers or switches
- *Operating temperature -40~+60C
- * No wiring

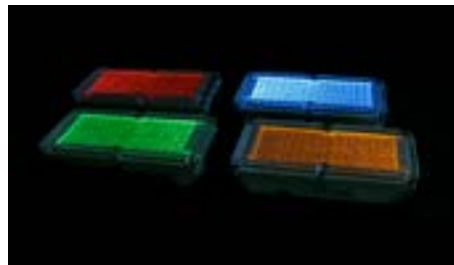

Solar Pavers

Our solar Paver style lights are ideal for adding dramatic effects to evening landscapes including driveways, sidewalks, roadways, swimming pool decks, patios, gardens, walkways, stairways, bike paths, ponds, fountains or wherever you can imagine adding beauty, safety and functionally.

We utilize double-layer capacitors rather than rechargeable batteries to store their energy so the store device never needs replacing.

Solar Lanterns

Our self contained solar Lanterns are unique in their design and engineering. The solar Lantern comes with four concrete anchor bolts and can be easy installed in minutes.

Our solar Lantern adds beauty to it's surroundings while providing people with a sense of safety by illuminating their surroundings with a brilliant glow.

The solar Lanterns are 363mm (1.19 feet) tall and 246mm (9.70 inches) wide at the top and come with four metal concrete anchors bolts.

Solar Bollards

The solar Bollard lights have a main lens with 9 high output white LED's. It also has three smaller narrow lenses with high output Blue LEDs. This combination of LED adds to the Bollard light's aesthetics.
